

## Silent Gliss Curtain Tracks – navigation tool to help you find the best track for your requirements.

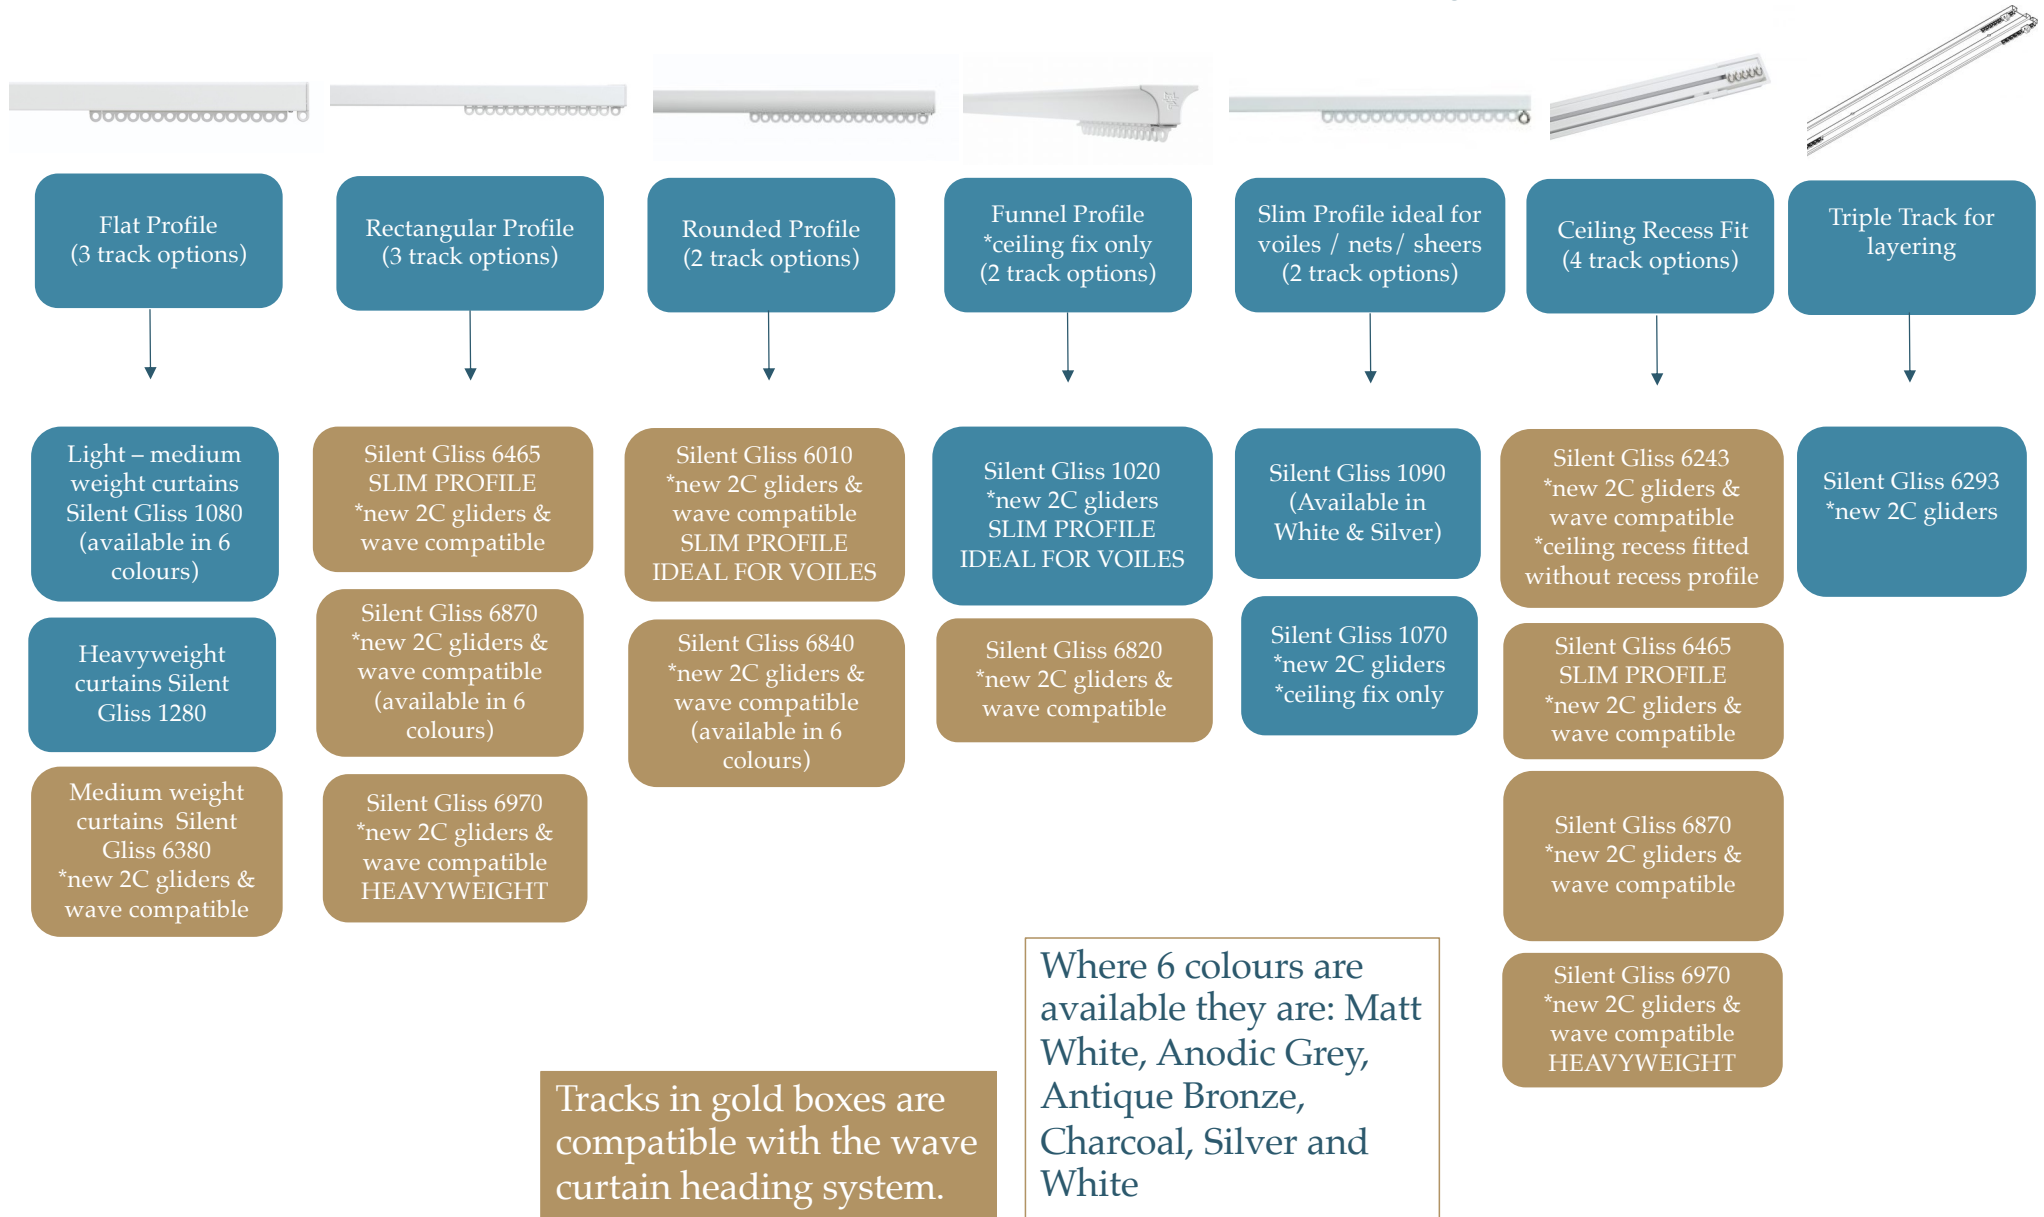

Please note all of the Silent Gliss curtain tracks are available in 6m profile lengths so are suitable for extra wide windows and bi-fold doors. We can also bend all of the tracks (except the triple track 6293) so they are all suitable for bay and L shaped windows.

You may also wish to consider the Silent Gliss Metropole tracks. These have been designed to look like a curtain pole but operate like a track and are available in a range of contemporary colours to complement current interior design trends. They are available with a range of finial styles in a 23mm, 30mm and 50mm diameter and can be hand drawn or corded (30mm and 50mm only). The 30mm and 50mm are available with wave gliders so are suitable for wave curtains.

# Silent Gliss Hand Drawn Curtain Tracks – navigation.

All tracks are suitable for extra wide windows, bi-fold doors and L and bay shaped windows. All tracks come in white; if other colours are available these are stated next to the track reference. For glider information & curtain weight guides please refer to our separate blog post on this.

Please refer to weight charts on the product specification tabs for weight guidance on corded tracks.

## Silent Gliss Corded Curtain Tracks – navigation.

What type of curtain heading are you going for?  
(please refer to page 4)

Standard curtain heading such as pencil pleat or pinch pleat.

Silent Gliss 3900

Silent Gliss 3970

Where 6 colours are available they are: Matt White, Anodic Grey, Antique Bronze, Charcoal, Silver and White

The 3870 recess track can also be supplied with standard or roller gliders for traditional style curtain headings and the 3970 with roller gliders for heavy weight curtains.

Curtain Headings for Curtain Tracks

Buttoned Pinch Pleat

Double Pinch Pleat

Triple Pinch Pleat

Gathered Heading

Goblet Pleat

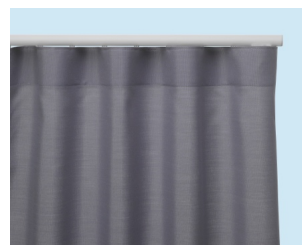

Pencil Pleat

Wave Headings

A 60mm wave provides a shallower wave, and a wider stack back. The stack back is 23cm per metre of curtain track.

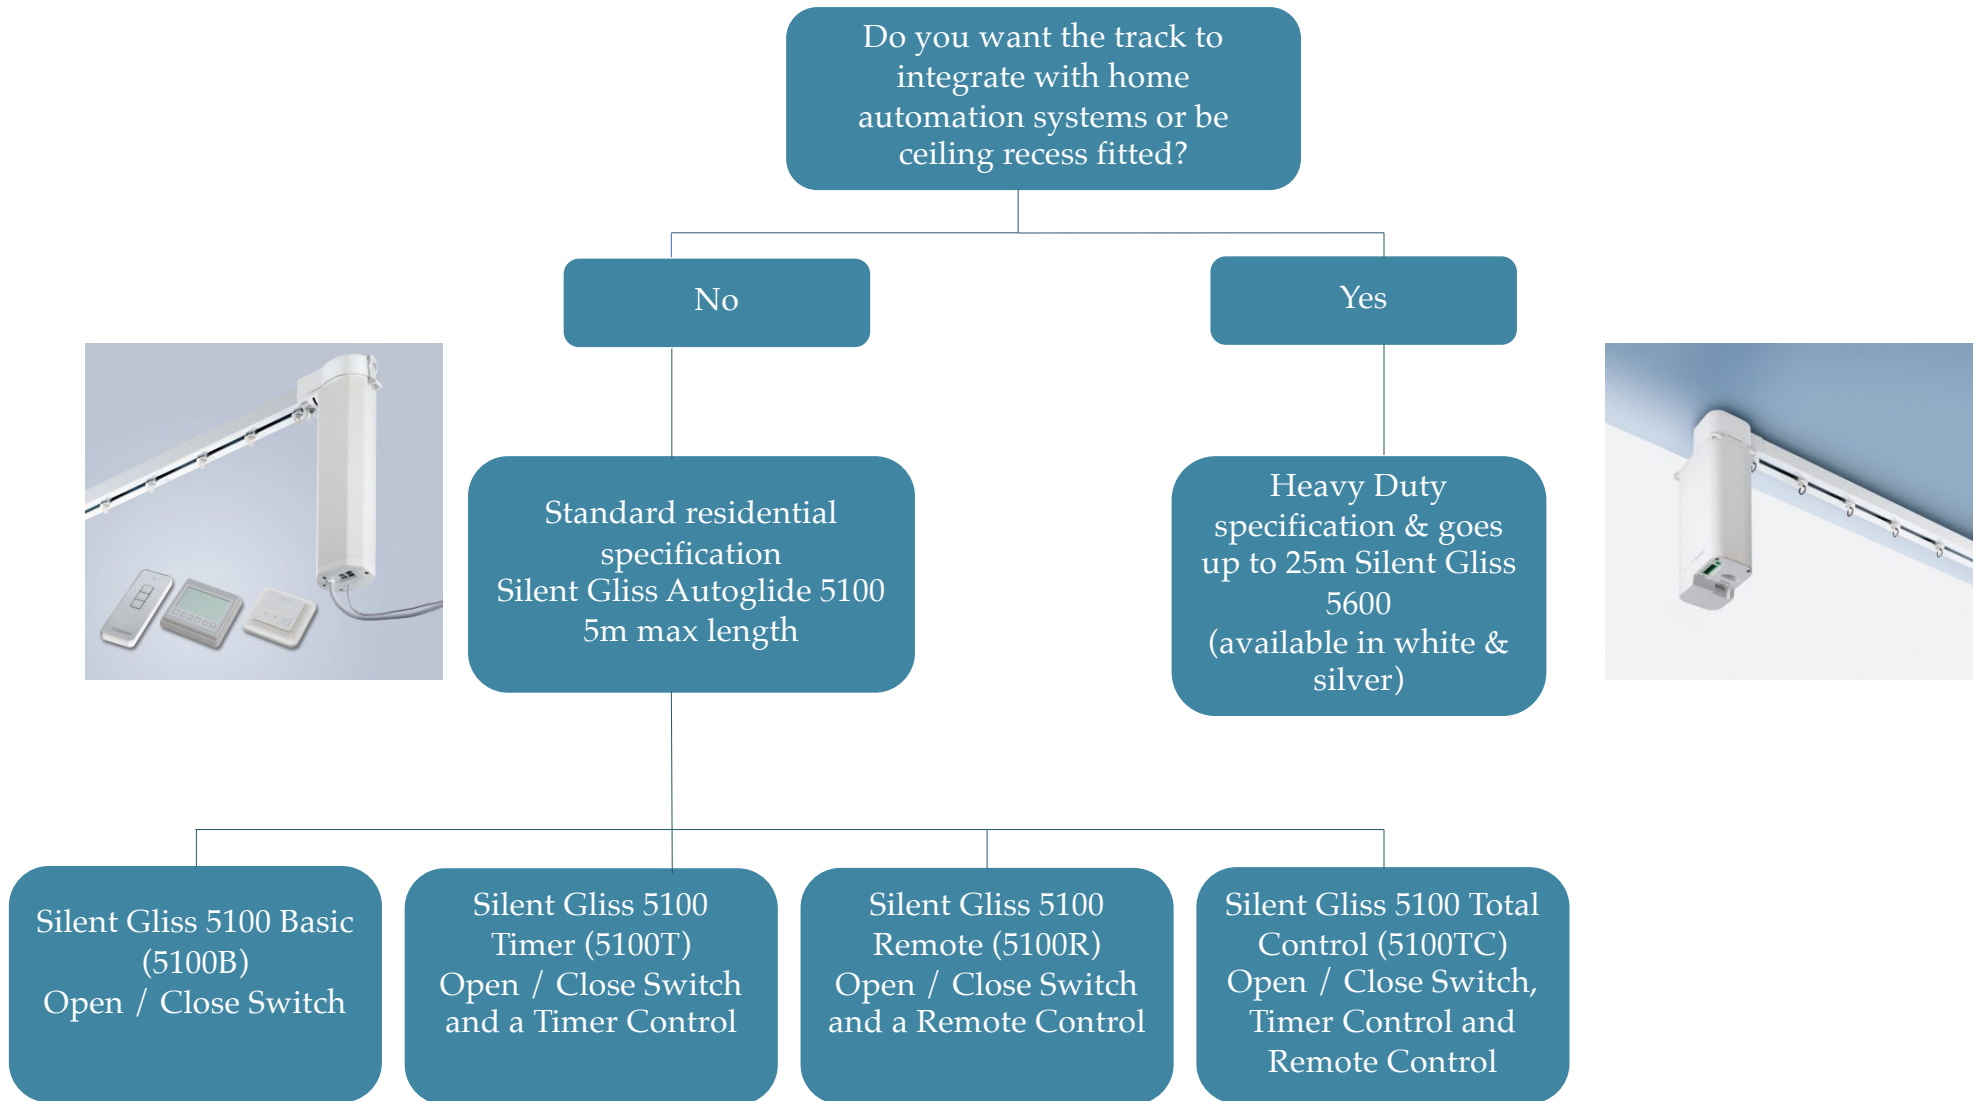

60mm wave

80mm wave

An 80mm wave provides a deeper wave, and a slimmer stack back. The stack back is 18cm per metre of curtain track.

## Silent Gliss Motorised Curtain Tracks – navigation.

For home automation integration you may also wish to consider the Somfy motorised track. Please refer to the weight chart on the product specification tab for weight guidance on the Silent Gliss 5100 track. The Silent Gliss motorised tracks can be bent for bay windows (maximum 2 bends or one continuous curve).
