Contemporary Curtain Design

Silent Gliss introduced the unique curtain heading system that turns traditional curtains into a striking modern design statement.

As an alternative to traditional pinch, pencil pleat or goblet style headings, Wave and Wave XL offer a more contemporary curtain presentation.

When opened, the curtains stack back neatly and straight and when closed the fabric hangs in a smooth, continuous wave effect.

Wave Curtain Tracks

Wave is offered for various Silent Gliss systems:

- Silent Gliss electrically operated curtain tracks.
- Silent Gliss hand or cord operated curtain tracks.
- Silent Gliss hand operated recessed curtain tracks to give the impression that the curtains literally hang directly on the ceiling!
- Silent Gliss Metropole, a decorative curtain pole system available in a wide range of different colours and sizes.

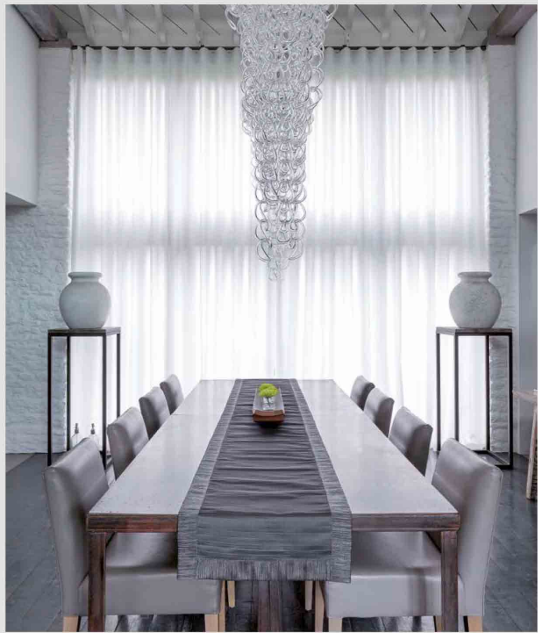

Wave – The Original

The original Wave has a number of options allowing you to choose the size of the wave and depth of the curtain.

Silent Gliss can recommend a nationwide network of dealers able to fulfill all your needs.

Undulating curves transform into a neat stack-back.

Wave XL – Applications

Wave XL reflects the current trend towards smooth rounded forms and shapes in today's interior decoration. It offers new alternatives for high and large application areas.

Wave XL is available with a range of Silent Gliss curtain track systems, either hand, cord or electrically operated.

Ambitious and sophisticated technique combined with precise finishing and carefully selected fabrics are required to ensure the perfect functioning of this stunning curtain system. It demands technical competence and experience: Silent Gliss – the right partner for those requirements.

Wave XL – The Large Size

Harmony – Wave XL takes the original Wave and adds a twist which results in a spectacular design. Modesty aside, quite possibly the most beautiful contemporary curtain in the world.

Silent Gliss Fabric Collection

Silent Gliss offers a wide range of fabric styles and colours. By choosing one of these specially tested fabrics you can be assured of a perfect curtain.

All fabrics for Wave and Wave XL are Oeko-Tex certified and fire retardant. Silent Gliss provides solar, heat and acoustic coefficients to help select fabrics which preferably manage light, glare and heat control in a room.

Silent Gliss – the global premium partner for high-end demands.

Silent Gliss is the leading global supplier of motorised and manual curtain and blind systems in the premium market. We offer our customers the very best in terms of quality, design, technology, service and individuality. Our core competence is innovation – inspired and driven by customer needs. A team of highly skilled and experienced professionals work on new developments as well as on the improvement of existing products. With committed customer support teams, Silent Gliss provides an extensive range of services including technical advice, fitting services and maintenance all around the world.
